

ACME & CO.

Acme & Co is a company that was dreamt up from a long-standing ambition and need to create the perfect coffee cup.

Acme Cups are designed by coffee professionals for everyone, every bit of thought and personal experience goes into each design.

Our approach to this business is simple; design a functional, durable, yet elegant product. With our extensive backgrounds in the industry, we take what we know and apply it to our products.

&

Evolution Range

Designed for third wave espresso standards, the Evolution series offers precision measurements with an enhanced drinking experience.

The smooth inner-gradient makes for an easier pour for latte artists. While the base is thick for improved heat retention, the lip is finer and tapered to provide a pleasant and more elegant drinking experience. The redesign of the handle is to ensure the cup is comfortable to hold and stackable. We have thought about precious bench space so only have 3 different saucers to match our 6 different styles of cups. All our saucers are sold separately and the full range is available in eight beautiful colours.

Our cups are thoroughly tested through customer feedback and daily use at our flagship café, Prefab in Wellington, where 1,200 cups of coffee are served each day.

Union Cup

The Union mug is our version of the classic New Zealand cafeteria mug that was used by the Union Workers in their cafeterias during the 1950s.

At 230ml, it's perfect for bottomless filter coffee & endless cups of tea.

110ml Taster

Taster Range

We wanted to design a cupping bowl that not only had the desired features but that was also multifunctional.

We designed the bowl to be a little tighter, so that the crust doesn't disperse and the bloom is tighter. Then when it does come to breaking the crust, the grinds have further to fall giving you more space to taste your coffee.

The bottoms are coloured, making them perfect for triangulations. Each pack of 6 has:
2 x Kokako, 2 x Dolphin & 2 x Fejioa.

They're also a great option for milk coffees; the smallest is perfect for a piccolo or fluffy, and they're stackable, making them ideal for tight spaces.

250ml Bibby
Milk

250ml Bibby
Rose

250ml Bibby
Olive

400ml Bobby
Milk

Finer Range

We found an unusually shaped tea cup at the bottom of a box that inspired our new tea and filter coffee cup, sweetly called Bibby.

We design to serve a purpose and Bibby's unusual shape isn't just a design feature, but also fills the functional aspect of our design ethos.

The lower half of the cup is a more confined space, keeping the beverage warm while the top half cools the beverage a little faster. Bibby also features our signature handle, it works along side our Evolution range and stacks.

We felt that Bibby needed a larger companion; so let us introduce Bobby. Like Bibby, it's a finer porcelain and has our signature handle. At 400ml, the Bobby mug is perfect for large cups of filter coffee or tea and comes in our classic Milk colour.

Tajimi

Maruasa Porcelain Factory is located in Tajimi and is famous for its ceramics. The factory has been owned and operated by the Matsubara family for over 100 years.

The very talented Keishiro Matsubara invited Acme & Co to visit the factory and from there he designed the Tajimi cup with some creative input from us.

Each 300ml cup has a polished matt exterior with a glazed colour interior. They're ideal for serving filter coffee, tea and wine. As they're porcelain, Tajimi are perfect at keeping the beverage at the desired temperature.

We have three colours available: Milk, Kokako and Feijoa.

Tajimi are our first product that come in individually packaged boxes, making them perfect retail item.

MOQ, 6 units.
